

# JUNE 6TH TO 28TH, 2018

## Voyage Summer Camp

- Learn the skills necessary for transitioning from high school to the many choices that follow graduation
- Participate in hands-on activities and career exploration in the fields of Outdoor Leadership, First Responder, the Culinary Arts or Learning to Fly!

*Applications due by  
May 4th!*

This year's camp will be held at the Voyage School in Anchorage. Students have the choice of participating in the Culinary Arts, Outdoor Leadership, Journey to Flight or First Responder strands as an applied, project-based activity. Successful completion of these strands allows students to gain industry certificates and high school credit. Students will receive Alaska Food Handler card, Emergency Trauma Technician, or Wilderness First Aid Certifications. Students may be able to work towards their learner's permit or driver's license.

Throughout the camp students will participate in academic and career sessions, practice using urban life skills, and employ leadership and teamwork skills. They will tour campuses and job sites, meet with recruiters, and research their post-secondary options. Finally, students will get a chance to experience the "Big City" in fun and healthy evening and weekend activities.

# Voyage Summer Camp Strands

## Culinary Arts

In this strand, students will explore the many career opportunities in the Food Service industry. This industry continues to grow across the world and features many exciting and rewarding careers to choose from. Students will work hands-on in a full commercial kitchen where they will learn essential cooking skills such as how to correctly read a recipe, use kitchen appliances, and properly use kitchen knives.

Students will earn their Alaska Food Handlers card, a requirement for anybody working in a restaurant or other food service job. They will learn important food safety concepts such as hand washing, preventing cross-contamination, and the temperatures required to safely prepare meats.

## First Responder

In the First Responder strand, students will complete an Emergency Trauma Technician (ETT) certification course taught by certified Emergency Medical Service instructors. The ETT certification was originally developed in Southeast Alaska to teach people living in remote areas the basics of emergency medical care. Students will learn basic life support such as patient assessment, CPR, and use of defibrillators, as well as how to recognize and treat the symptoms of a heart attack, stroke, poison, hypothermia, burns, broken bones, and other medical conditions. It is a great way to introduce students to the field of emergency medical response and is a stepping-stone on the way towards more advanced EMS certifications.

Students in this strand will meet with a variety of professionals in the First Responder field, such as VPSOs and Law Enforcement, Firefighters, and Paramedics. Students will have the opportunity to tour stations and meet with recruiters. They'll also receive instruction in the steps necessary after high school to enter these exciting careers.

## Journey to Flight

Journey to Flight is for students already enrolled in the Voyage AVSTEM course. If you are interested in this topic but not currently enrolled please apply during the 2018-2019 school year.

## Outdoor Leadership

The Outdoor Leadership strand will teach students wilderness safety and conservation techniques. Students attending this strand will take a Wilderness First Aid (WFA) course, a fast-paced, hands-on training designed to prepare people for emergency situations they might encounter while exploring the great outdoors.

Students attending this strand will spend one week in Denali National Park learning about the natural sciences and going on hikes. Students will be introduced to many outdoor career fields such as the Alaska Department of Fish and Game, the Forest Service, Wilderness Guiding and Biology. Students will then go on a three-night overnight kayaking trip in Prince William Sound.

They'll learn the steps necessary to enter those careers and meet with industry professionals. The students will plan for and participate in multiple wilderness excursions and camping trips in a variety of settings. This strand is ideal for a student who loves being outdoors and going on adventures!
